DETAILED ACTION

Election/Restrictions

1. Claims 7-19 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in Paper No. 9.

Applicant's election with traverse of claims 1-6 and 20 in Paper No. 9 is acknowledged. The traversal is on the ground(s) that "the subject matter of claims 1-20 is sufficiently related that a thorough and complete search for the subject matter of the elected claims would necessarily encompass a thorough and complete search for the subject matter of the non-elected claims. Thus, it is respectfully submitted that search and examination of the entire application could be made without serious burden." This is not found persuasive because the Examiner has shown in the restriction requirement separate classification which would require a different field of search which would further result in a serious burden on the Examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation “ a ribbon portion having a length of 2 to 300 mm is formed in at least some of the polarization-maintaining fibers” in claim 1 is deemed vague and indefinite.

Clarification is requested.

The recitation “positioning means” in claims 3 and 4 is deemed vague and indefinite.

Clarification is requested.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 1-6 and 20** are rejected under 35 U.S.C. 102(b) as being anticipated by Shahid (5,862,281).

Shahid discloses a plurality of polarization-maintaining fibers (Fig. 2, #10) wherein a ribbon portion (Fig. 2, #30) having a length of 2 to 300 mm is formed in at least some of the polarization-maintaining fibers. Regarding **claims 3-6**, note the ribbon portion is provided with a positioning means (Fig. 4, #46) formed as a series of convex and concave shapes. Regarding **claim 20**, note a polarization-maintaining optical fiber array made of a ribboned polarization-maintaining fiber (Fig. 2, #10).

Regarding **claim 2**, process limitations are given little or no patentable weight. The method of forming the product is not germane to the issue of patentability of the product itself. Further, when the prior art discloses a product which reasonably appears to be either identical

with or only slightly different than a product claim in a product-by-process claim, the burden is on the Applicant to present evidence from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art. *In re Brown*, 459 F.2d 531, 173 USPQ 685 (CCPA 1972); *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974). This burden is NOT discharged solely because the product was derived from a process not known to the prior art. *In re Fessman*, 489 F.2d 742, 180 USPQ 324 (CCPA 1974).

Furthermore, the determination of patentability for a product-by-process claim is based on the product itself and not on the method of production. If the product in the product-by-process claim is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 946, 966 (Fed. Cir. 1985) and MPEP §2113. In this case, the limitation “is one formed by fixing and coating said polarization-maintaining fibers with an adhesive and aligning end faces ...” in claim 2 is a method of production and therefore does not determine the patentability of the product itself.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of ribboned polarization-maintaining fiber similar to that instantly disclosed.
